I participated in a **three-day training program on Artificial Intelligence and Machine Learning** conducted at **Haridwar University** under the **Edunet Foundation**, in collaboration with **IBM SkillsBuild**. The training was delivered by **Mr. Aman Shrivastava**, an experienced AIML trainer, and it proved to be a very informative and valuable learning experience.

The sessions covered important and trending topics such as **Artificial Intelligence, Machine Learning, Large Language Models (LLMs), and Generative AI**. The concepts were explained in a **clear, systematic, and beginner-friendly manner**, which helped us understand the fundamentals even if we were new to the domain. Along with the core syllabus, Sir also explained additional concepts like **CPU, GPU, and TPU**, **computational requirements**, and the **scope and real-world applications of Machine Learning**, which enhanced our overall understanding.

One of the most appreciable aspects of the training was **Mr. Aman Shrivastava Sir's approachability and dedication**. He genuinely tried to **help each and every student**, addressing individual doubts, technical issues, and conceptual problems patiently. His supportive nature created a positive learning environment where students felt comfortable asking questions and clarifying their doubts.

The training also included **hands-on exposure to IBM Cloud**, where we learned how to work with **data analytics, machine learning tasks, AI agents, and chatbots using IBM Watsonx**. We were introduced to practical workflows such as **model training, prediction, and cloud-based deployment**, which helped us connect theory with real-world applications.

Additionally, the program provided access to **multiple certifications through IBM SkillsBuild**, which added significant value to the training and motivated us to continue learning beyond the sessions. The training laid a strong foundation, and now the responsibility lies with us to **further explore, practice, and build on the concepts introduced during the program**.

While the training was highly beneficial, **having more duration and extended hands-on sessions would have made it even more impactful**. Additional practical time would have allowed deeper exploration of tools and real-world use cases.

Overall, the training was **well-structured, insightful, and motivating**. I am grateful to **Edunet Foundation, IBM SkillsBuild** and especially **Mr. Aman Shrivastava Sir** for their efforts in making this program a meaningful learning experience.
